

Ultra High Pressure

A Division of FC Cleaning Systems Ltd

Den-Sin C-2500/25D ultra high pressure

Hot-dip galvanized frame with powder coating, lifting eyes and forklift pockets, up to 2500 bar maximum pressure at 25 l/min cold water – ideal for surface preparation.

Specification

Pressure	2500 bar
Flow rate	25 l/min
Engine	Deutz 6 cycl, turbo charged with Intercooler air cooled diesel
Pump (rpm)	510
Net weight	1950 kg
Dimensions	2600x1450x1800 mm
Water temp	Cold water
Fuel tank	140 l
Water tank	250 l

Benefits

Built in gear box
Non corrosive material used in pumps, pipe and fittings
Easy access to pump for service and maintenance
Triplex pump with carbide plungers
Trigger operated dump gun
In line valves
'floating' plunger system with water cooling
Throttle control with Vernier adjustment
Control panel with oil-pressure, temperature, hour meter and RPM gauges
Two step water filtration system with booster feed pump
Built-in fuel tank with level indicator

Safety system

Safety valve protecting against over-pressurization
Automatic engine shut-down system
Low water level and pressure cut-off system

Standard equipment

20 m high pressure hose
Spray lance
High pressure gun
